#### Description of the individual points

##### 1. Maximum 50 Webpages

The target is the development of a web site with up to 50 undersides. Arbitrarily many undersides can be made on request.

##### 2. Optimizes for Desktop-Computer, Laptop, Tablet and Smartphones

The web site is developed so that this adapts to the different dissolvings of a PC, Tablets or smartphones automatically. The high user-friendliness is ensured with that.

##### 3. Contact form with Autoresponder

This one is lay out the contact form with car responder sent as an answer automatically (an e-mail) as soon as the form data were transmitted successfully. The form data can be stored in a database on request.

#### 4. Newsletter / Search mechanism

Laying out the form to the subscribe of the newsletter. Being able to find setting of a search function faster around information.

#### 5. Web site facilities at the Provider

The facilities of the web site are carried out at the provider of her choice so that her web pages are callable over the Internet. I take on the choice of the provider and the registration of your chosen domain on request.

#### 6. Administration of web sites (Maximum 6 Month)

Already at the developmental stage one should care for the later procedure determine the web site. Because only a current web site makes sense.
